May 8, 2016

Dear Participants and Colleagues,

We would like to let you know that a dedicated website for the IHTC-15 plenary panel is now online:

<http://www.ihtc-15.org/IHTC-15-plenary-panel.shtml>

The late Prof. Nobuhide Kasagi was the panel Moderator. Unfortunately, after completing the panel session on August 14, 2014, he began receiving continuous medical care, and passed away on July 29, 2015.

We edited his last work, as shown on the website, which presents the main topics discussed as well as important information that Panelists and Attendees provided during the session. Please explore the links to panelists' slides and presentations, important messages, and the vigorous discussions from the floor. A video of the entire panel session is also available. We have arranged postscripts for a short introduction to the panel session, and a diagram showing the relationships among the panelists' messages and floor discussions so you can get a quick overview.

We are very grateful to Prof. Kasagi for his outstanding contributions, and hope that this marks a significant milestone for the society of thermal science and engineering going forward.

Yours sincerely,

Hideo Yoshida, Hiroshi Iwai and Kazuya Tatsumi
IHTC-15 Executive Committee, Kyoto, Japan

Website Contents:

Part 1: Panel Records

1. Purpose of Panel, from the Moderator
2. Message from Panelists
3. Message from the Panel
4. Discussions from Floor

Part 2: Postscripts for Quick/Better Understanding

1. Problem Setting by Moderator and Standpoints of Panelists
2. Visualization of Relationships among Panelists' Messages

The Video of the Panel Session
